

Regression Report Plugin

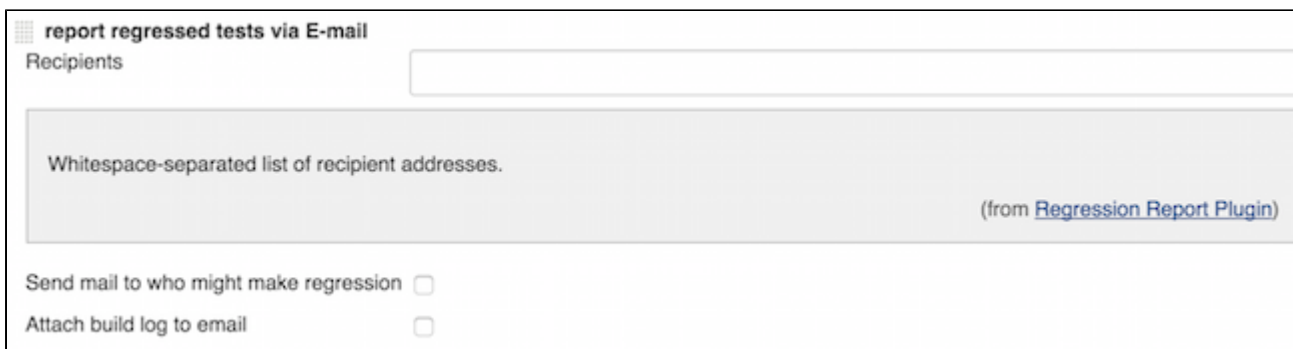

Plugin Information

View Regression Report [on the plugin site](#) for more information.

Regression Report Plugin

This plugin sends a mail if your test cases find regression (new failure).

Screen Shot

The screenshot shows a configuration form titled "report regressed tests via E-mail". It includes a "Recipients" label and a text input field. Below the input field is a grey box containing the text "Whitespace-separated list of recipient addresses." and "(from [Regression Report Plugin](#))". At the bottom, there are two checkboxes: "Send mail to who might make regression" and "Attach build log to email", both of which are currently unchecked.

History

See [README.md](#) for detail.
