

UpdateBot Plugin

This plugin makes it easy to upgrade downstream projects when you release a new version via [UpdateBot](#)

Plugin Information

View Updatebot [on the plugin site](#) for more information.

Background

The aim of the UpdateBot plugin is to automatically raise Pull Requests on downstream projects whenever you perform a new release of a Jenkins plugin, maven artefact, npm package or go based library or microservice.

Configuration

Refer to the [README](#) in the plugin repository or the [UpdateBot configuration guide](#)

Releases

Refer to the [CHANGELOG](#) in the plugin repository
