Older versions of this plugin may not be safe to use. Please review the following warnings before using an older version:

- [Missing permission checks](#)

This plugin is up for adoption. Want to help improve this plugin? [Click here to learn more!](#)

Shows a dependency graph of the projects using graphviz. Requires a graphviz installation on the server.

Features

- Show the dependency graph via graphviz
 - restricted to projects in a view
 - restricted to one project
- Respects access permissions
- Show the graphviz source file

Screen

The screenshot shows the Hudson web interface with the 'Dependency Graph' view selected. The main content area displays a dependency graph with nodes in rounded rectangles and arrows indicating dependencies. The nodes are: 'test_parametrized_trigger' (parent of 'Project1' and 'noop'), 'Test_Builds' (parent of 'job1' and 'job2'), '01_Build_Test_Project' (parent of '02_Unittest_Test_Project'), 'test_windows', 'test_matrix', 'on_join' (parent of 'Project1' and 'noop'), '03_Integrationtest_Test_Project' (parent of '04_Create_Test_Reports' and '05_Publish_Test_Artifacts'), and '06_Deploy_Project' (parent of '05_Publish_Test_Artifacts').

On the left sidebar, there are navigation links: 'New Job', 'Manage Hudson', 'People', 'Build History', 'Project Relationship', 'Check File Fingerprint', and 'Dependency Graph'. Below these are sections for 'Build Queue' (No builds in the queue), 'Build Executor Status' (Master: 1 Idle, 2 Idle), and 'white (offline)' (1 Offline).

At the bottom of the graph area, there is a link: 'Graph in graphviz format'.

Changelog

Version 0.13 (Oct 23, 2017)

- [Fix security vulnerability](#)

Version 0.12 (Oct 16, 2017)

- Update version of jsPlumb

Version 0.11 (Mar 22, 2013)
