

Resource Disposer Plugin

Track resources to be disposed asynchronously.

Plugin Information

View Resource Disposer [on the plugin site](#) for more information.

Older versions of this plugin may not be safe to use. Please review the following warnings before using an older version:

- [CSRF vulnerability and missing permission checks](#)

Asynchronous resource disposer

Resource	State	Tracked since	
OpenStack OSCloud machine 5941c5ac- be1b-4799- b1f5- daa8ae8f557f	<code>jenkins.plugins.openstack.compute.internal.Openstack\$ActionFailed: ActionResponse{success=false, fault=Instance 5941c5ac-be1b-4799-b1f5- daa8ae8f557f is locked, code=409}</code>	2018-06-28 20:44	<input type="button" value="Stop tracking"/>

Resource Disposer is a utility plugin for other plugins to depend on. Resources that are no longer needed (VMs to delete, entries in other systems, etc.) can be tracked for asynchronous disposal.
