

Plain Credentials Plugin

Allows use of plain strings and files as credentials.

Plugin Information

View Plain Credentials [on the plugin site](#) for more information.

Description

This plugin provides two new types of credentials:

- `FileCredentials` or *Secret file*.

Kind	<input type="text" value="Secret file"/>
Scope	<input type="text" value="Global (Jenkins, nodes, items, all child items, etc)"/>
File	<input type="button" value="Choose File"/> No file chosen
Description	<input type="text"/>

- `StringCredentials` or *Secret text*.

Kind	<input type="text" value="Secret text"/>
Scope	<input type="text" value="Global (Jenkins, nodes, items, all child items, etc)"/>
Secret	<input type="text"/>
Description	<input type="text"/>

Usage

These credentials were originally designed to be used together with the [Credentials Binding Plugin](#). See the [wiki](#) for an example use case.

However, as described in the [Credentials Plugin](#) wiki, they could potentially be used by any other plugin that requires them.

Changelog

Version 1.5 (2018-12-11)

- Compatibility with [Configuration as Code Plugin](#) for file credentials.

Version 1.4 (Feb 15, 2017)

- Fix an NPE when uploading a secret file and logging is at level FINE or lower

Version 1.3 (Sep 26, 2016)

- JENKINS-36432 follow-up Switch to SecretBytes based storage of file credentials. ([PR #6](#))

Version 1.2 (May 19, 2016)

- JENKINS-30926 Handle blank filename.
- JENKINS-27391 Improved display of secret text credentials.

Version 1.1 (Jan 15, 2015) (requires 1.580.x)

- JENKINS-26099 Permitting ID to be specified on new credentials.
- Display *Scope* control where appropriate.

Version 1.0 (Jun 16, 2014)

- First general release.

Version 1.0 beta 4 (Oct 01, 2013)

- Added random UUID into bound file paths.
- Factored build wrapper into [Credentials Binding Plugin](#), which you must install for that functionality to continue to work.

Version 1.0 beta 3 (Sep 22, 2013)

- Added a “secret ZIP file” binding, closest to the operation of the now-deprecated [Build Secret Plugin](#).
- Improved help text.
- Moved binding SPI out of the implementation package; it is intended to be usable from other plugins.

Version 1.0 beta 2 (Sep 22, 2013)

- Backdated core dep to 1.509.2.
- Fixed file reupload.

Version 1.0 beta 1 (Sep 21, 2013)

- Initial version.
