

Datadog Plugin

Plugin Information

View Datadog [on the plugin site](#) for more information.

Older versions of this plugin may not be safe to use. Please review the following warnings before using an older version:

- [API key gets transmitted in unencrypted form](#)

This plugin is used to forward metrics, events, and service checks to your account at [Datadog](#), automatically.

Details

Further project details, downloads, and issue tickets are available at <https://github.com/DataDog/jenkins-datadog-plugin>

Open Issues

We actively use Github's ticketing system to track issues, [here](#). However, some may show up on JIRA. For those situations, here is that list.

Type	Key	Summary	Assignee	Reporter	Priority	Status	Resolution	Created	Updated	Due
		Can't show details. Ask your admin to whitelist this Jira URL.
