

Ftp Rename Plugin

{jenkins-plugin-info:ftp-rename}

That's me.

Jenkins plugin for ftp rename

Automating a rename in a ftp server.

Usage

In Jenkins job, set the ftp server info.

Ftp Rename

Server	<input type="text" value="blablabla.com.br"/>
Port	<input type="text" value="21"/> 

if you don't specify the port, the default port is 21.

(de [FTP Rename Plugin](#))

User	<input type="text" value="ftpuser"/>
Password	<input type="password" value="....."/>
Path	<input type="text" value="/content"/> 

Specify the path to your artifact.

(de [FTP Rename Plugin](#))

In a job configuration add a ftp rename step and define the old name and the new name.

FTP Rename 	
Artifact name	<input type="text"/>
New artifact name	<input type="text"/>
Remote directory	<input type="text"/>
