

Pipeline Multibranch Defaults Plugin

Plugin Information

View Pipeline: Multibranch with defaults on [the plugin site](#) for more information.

Enhances Pipeline plugin to handle branches better by automatically grouping builds from different branches. Supports enable one default pipeline.

This plugin adds a new build configuration mode to multibranch pipeline jobs. The new mode is called "with default Jenkinsfile".

Refer to the [project README.md document](#) to learn more.

Changelog

Refer to the [CHANGELOG.md document](#) for plugin release notes.
