

Dingding Notification Plugin

Dingding Notification Plugin Intro

Plugin Information

View Dingding[] on the plugin site for more information.

Allows users to send build notifications via [Dingding](#)-

1. Dingding Notification Plugin

Dingding notification plugin is a simply config plugin, it can notify to your specified dingding group the build job status including:start build\build success\build failed.

Chinese Intro: (<https://github.com/jenkinsci/dingding-notifications-plugin/blob/master/readme-cn.md>)

1. Contributing
 1. Fork it
 2. Create your feature branch (git checkout -b my-new-feature)
 3. Commit your changes (git commit -am 'Add some feature')
 4. Push to the branch (git push origin my-new-feature)
 5. Create new Pull Request
 6. Dev build
 - ...
- ```
mvn package --settings=./settings.xml
```

1. Installation
  1. create a Dingding robot in Dingding side

Dingding -> ... config -> new robot

choose the 'custom robot'

config robot

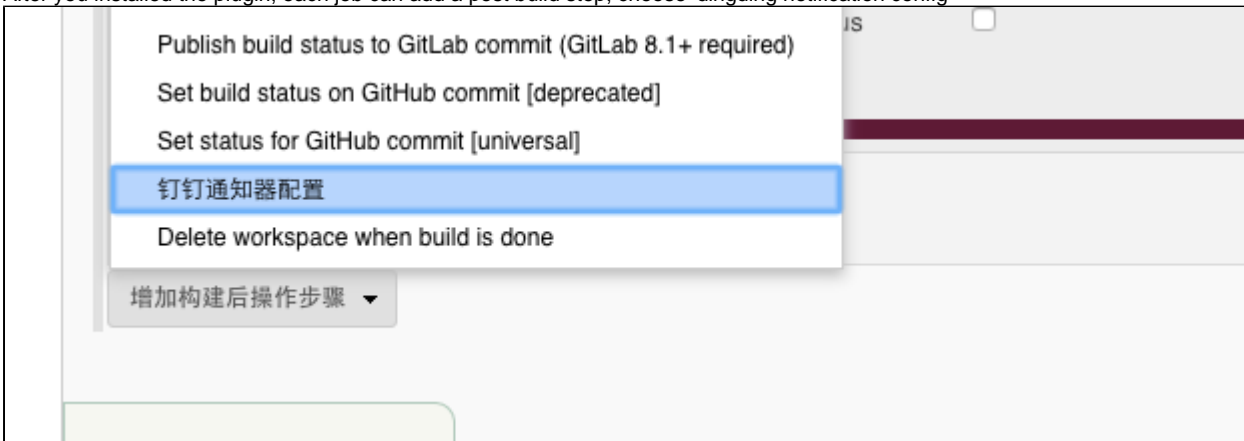

save the access token

## 2. Config Jenkins

After you installed the plugin, each job can add a post build step, choose 'dingding notification config'

input the access token in previous step, and please input the Jenkins URL because plugin don't know where is your jenkins, if you wanna the notification can link directly to your build, please make sure the URL is the Jenkins ROOT url.

Dingding plugin will try to get your Jenkins Root location when you add the post step, so you won't set your Jenkins URL in new version 1.3.

Add another task

### 钉钉通知器配置

jenkins URL

钉钉access token

在启动构建时通知

构建成功时通知

构建失败时通知

增加构建后操作步骤

3. Enjoy!
