Jenkins Hidden Parameter Plugin

This plugin adds support for Parameter. After the plugin is installed, in job configuration's page, you can see Hidden Parameter.

Characteristics

1. Parameters once more, it looks bad user experience. this plugin can resolve the problem.
2. Some key parameters, once modified, can lead to the risk. these parameters, only administrator can modify, to reduce the risk.
3. Hidden parameter, only hide in the build execution, in job configuration's page can modify.
4. After the build, parameter list can display hidden parameters.

Install

<input checked="" type="checkbox"/>	Jenkins Hidden Parameter plugin Warning: This plugin is built for Jenkins 1.541 or newer. It may or may not work in your Jenkins.	0.0.4
-------------------------------------	---	-------

Use Case

After the plugin is installed, in job configuration's page, you can see Hidden Parameter:
<https://github.com/wy-scm/hidden-parameter-plugin/raw/master/images/JobConfiguration1.png>

for example, you add a hidden parameter, is called hidden_para.
<https://github.com/wy-scm/hidden-parameter-plugin/raw/master/images/JobConfiguration2.png>

click 'Build With Parameters' link, the parameter hidden_para of the set before, is hide, don't display in this page.
