

Display URL API Plugin

Plugin Information

View Display URL API [on the plugin site](#) for more information.

Provides an extension point to define alternate URLs for use in notifications.

URLs can be requested/extended for these UI locations:

- Root page.
- Job.
- Run.
- Run changes.
- Test result.

Changelog

2.3.0 - 16 November 2018

- [JENKINS-45478](#) Add an API that will allow extension plugins to decorate the clickable links additional parameters based on the context within which the link was generated.

2.2.0 – 28 November 2017

- [JENKINS-41502](#) Select provider using a parameter

2.1.0 – 3 October 2017

- [JENKINS-41578](#) Add a system property/environment variable to specify default display url implementation

2.0 – 14 April 2017

- [JENKINS-43538](#) API changes: DisplayURLProvider#getTestUrl() and DisplayURLProvider#getTestURL() was removed to break dependency on JUnit plugin
 - There is no known plugins using this API
 - If the API is being used via System Groovy or Pipeline scripts, these scrips will need to be updated after the release

1.1.1 – 3 Feb 2017

- Depend on JUnit 1.19 as previous much older version of this plugin appears not to be available in all update center mirrors, causing installation failure.

1.1 – 3 Feb 2017

- [JENKINS-41677](#) Expose display URLs in environment variables
 - `RUN_DISPLAY_URL` – links to the run result
 - `RUN_CHANGES_DISPLAY_URL` – links to the changes page for a run
 - `JOB_DISPLAY_URL` – links to the jobs homepage

1.0.1 – 31 Jan 2017

- [JENKINS-41578](#) Add a system property/environment variable to specify default display url imp

1.0 – 30 Jan 2017

- User can prefer Jenkins Classic or Blue Ocean URLs by changing a preference in their user profile

0.5 – 22 Sept 2016

- API update: Move getRoot() to super class so that implementors can use the default root calculation

0.4 – 22 Sept 2016

- [JENKINS-38067](#) encode URLs with Util.encode

0.3 – 8 Sept 2016

- If the root URL cannot be resolved fall back on "http://unconfigured-jenkins-location/"
- Improve test coverage

0.2 – 1 Sept 2016

- Ensure that folder and job names are encoded
- Fix root URL postfix slash

0.1 – 1 Sept 2016

- Initial version
