

Freestyle Multibranch Plugin

Plugin Information

No information for the plugin 'freestyle-multibranch' is available. It may have been removed from distribution.

Freestyle Multibranch Plugin

This is a multibranch project type that applies the same configuration to all branches.

Background

While developing the ideas that became the [literate project type](#), this was one of the initial early steps.

[Multi-Branch Project Plugin](#) does something similar but is released. On the other hand it does not integrate with the [Branch API plugin](#).

Version History

Version 0.1 (TBD)

- Initial release - awaiting somebody to step up and take ownership of this plugin.
