

Log Command

Plugin Information

View Log Command [on the plugin site](#) for more information.

Adds a command for the CLI which shows a build's console log. If [instant-messaging-plugin](#) is installed, it also provides a command for it (Jabber, IRC, ...).

CI Job

<https://jenkins.ci.cloudbees.com/job/plugins/job/log-command-plugin/>

Usage

CLI

```
show-log <job> [-b N] [-n N]
```

<job>: The name of the job.
-b N : N is the number of the build. Default value is the last build.
-n N : N is the number of log lines to show. Default values is 10.

Instant Messaging

Same as CLI, but it also provides an alias for the command: **sl**.

Changelog

Version 1.0.1

- * Better handling of errors.
- * Fixed typos in Wiki url.
- * Better plugin's name should appear now in the plugin manager.

Version 1.0.0

- * Initial Release
