

ImageComparison Plugin

Plugin Information

View Image comparison [on the plugin site](#) for more information.

This plugin calculates pixel similarity between any two images, for example between live screenshot generated by build and an expected screenshot.

Post-build Actions

Compare images (png or jpeg)

Path of first image to compare

Path of first image to compare. Used environment variables are expanded.

(from [Image comparison plugin](#))

Path of second image to compare

Path of second image to compare. Used environment variables are expanded.

(from [Image comparison plugin](#))

Required minimal image similarity in %

Required minimal image similarity in %. Violation of required similarity causes build failure.

(from [Image comparison plugin](#))
