

Console Log Text Replacer Plugin

Plugin Information

No information for the plugin 'console-log-text-replacer' is available. It may have been removed from distribution.

Allow users to replace text in the console log of a build

Features

- Allow replacing text before it is printed to the console to different text or empty strings

Requirements

- Jenkins version [1.625.3](#)

Configuration

- You must create a configuration file (a text JSON file) on your master jenkins
- The format of the file must be of the following

```
{
  "entries": [
    {
      "text": "hello_world",
      "replaceto": "hola_mundo"
    },
    {
      "text": "blue_sky",
      "replaceto": ""
    }
  ]
}
```
