

Vert.x Embedder

Plugin Information

View vertx [on the plugin site](#) for more information.

[Vert.x](#) embedder for Jenkins.

Reporting Bugs

Do **not** use Jira to report issues. Instead use [GitHub Issues for this project](#). Feel free to also ask questions via Issues, as comments on this page are not monitored.

This plugin enables an embedded, clustered [Vert.x](#) instance within Jenkins. It exposes various events – such as run completions, item creates and updates, etc. – as messages on the Vert.x EventBus. It also allows verticles to act as [QueueTaskDispatchers](#).

See the [README](#) and [wiki](#) for more information.

Requirements

Vert.x requires Java 7, therefore the Jenkins instance must be running on Java 7. Given that support for Java 6 ends in about 3 months, this shouldn't be a major concern.

History

1.0.1 – 2012-Nov-24

[Issues closed for 1.0.1](#)

1.0.0 – 2012-Nov-19

- Initial release
- Embeds Vert.x 1.2.3
