

Anonymous Uptime Check Plugin

```
{jenkins-plugin-info:anonymous-uptime-check}
```

Description

Allows unauthenticated access to check Jenkins' ability to run new jobs at [/anonymousUptimeCheck](#).

If Jenkins is quieting down, the response is a 503, otherwise a success 200 json response.

This can be used for external tools (*like pingdom, uptrends, pagerduty, etc.*) to check track uptime status of Jenkins instance.
