

# Tool Configuration

## CMake/CPack/CTest execution ?

Executes a tool of the CMake-suite with arbitrary command-line arguments.  
Useful to run cmake in script mode (cmake -P <script file>) or command mode (cmake -E <command>).  
(from [CMake plugin](#))

Tool

CMake installation

Arguments  ?

Command-line arguments. Quotes will be handled like a Unix shell does.  
(from [CMake plugin](#))

Working Directory  ?

The working directory for execution, relative to \$WORKSPACE.  
(from [CMake plugin](#))

Delete
