

Signal killer

Plugin Information

View signal-killer [on the plugin site](#) for more information.

Note: GitHub link is <https://github.com/jenkinsci/signal-killer>

This plugin extends ProcessKiller extension point and sends signal (currently SIGKILL) to given job via native GNU C library call.

Currently there's no possibility how to configure which signal should be sent.

TODO

- make configurable, which signal should be sent

Changelog

Release 1.0 (2011-02-09)

- Initial release
