

# Downstream Build Cache Plugin

Maintains a cache of the Upstream Downstream build relationships and makes it available for other plugins. Part of the [Yet Another Build Visualizer Plugin](#).

## Plugin Information

View Downstream Build Cache [on the plugin site](#) for more information.

## Contributions

Please use google-java-format with default settings for code formatting. PRs containing code that is not formatted correctly will not be merged.

## Changelog

### v1.3

- Helper methods to find downstream jobs in the queue

### v1.2

- First public release
