

Deployer Framework Plugin

Plugin Information

View Deployer Framework [on the plugin site](#) for more information.

Deployer Framework Plugin

This plugin provides a framework for deploying applications. Other plugins provide engines that plug in to this framework and perform the actual deployments.

Version History

Version 1.2 (2019-06-11)

- Update icu4j and various other dependencies.
- Code cleanups and bugfixes

Version 1.1 (2015-06-15)

- Fix broken icons

Version 1.0 (2014-10-29)

- Initial release (spun out from the [CloudBees Deployer](#) plugin)
