

Housekeeper Plugin

Plugin Information

View housekeeper [on the plugin site](#) for more information.

This plugin performs checks before and after every build to ensure that resources (e.g. open ports) are not leaked.

 For more information about this plugin, see the project's [readme on GitHub](#).

Configuration

Housekeeper

Checks	Enabled	<input type="checkbox"/>
	Title	<input type="text" value="Open Ports"/> ?
	Command	<input type="text" value="netstat -tulpn"/> ?
	Extraction RegEx	<input type="text" value="*:(\d+) .*"/> ?
	White List RegExes	<input type="text" value=""/> ? <div style="text-align: right;"><input type="button" value="Delete"/></div>
Enabled	<input type="checkbox"/>	
Title	<input type="text" value="Processes"/> ?	
Command	<input type="text" value="ps --no-header -eo args"/> ?	
Extraction RegEx	<input)"="" type="text" value="(.*"/> ?	
White List RegExes	<input type="text" value="sh /S+/housekeeper/w+\.sh"/> ? <div style="text-align: right;"><input type="button" value="Delete"/></div>	

Example Output

Console Output

```
Started by user anonymous  
Building remotely on slave-001 (remote-node) in workspace /home/slave/workspace/test-fail  
[test-fail] $ /bin/sh -xe /tmp/hudson5501740739896941809.sh  
BUILD_ID=dontKillMe netcat -ul 2115 &
```

```
Archiving artifacts  
Recording fingerprints
```
