

Warnings Plugin

Plugin Information

View Warnings [on the plugin site](#) for more information.

Older versions of this plugin may not be safe to use. Please review the following warnings before using an older version:

- [Arbitrary code execution vulnerability](#)
- [XML External Entity \(XXE\) processing vulnerability](#)
- [Arbitrary code execution vulnerability in rare circumstances](#)
- [Script Security sandbox bypass](#)

This plugin generates the trend report for compiler warnings in the console log or in log files.

This plugin reached end-of-life. All functionality has been integrated into the [Warnings Next Generation Plugin](#).
