

Request Rename Or Delete Plugin

This plugin adds new actions on jobs for users to request that their jobs are renamed or deleted

Plugin Information
View Request Rename Or Delete on the plugin site for more information.

! This plugin is no longer maintained and has been deprecated. The functionality has been migrated onto the new [Requests Plugin](#). Please download the new plugin from GitHub or search for "requests-plugin" under "Manage plugins/Available" on your Jenkins system to install it directly.

About this plugin

This plugin adds two new actions on jobs' screen, so that users who don't have the required permissions to rename and/or delete jobs can request the Jenkins administrator to do so.

The Jenkins administrator then gets a dedicated screen to handle all the incoming requests.

How does it work?

For users

Renaming request

Users who have the configure permission but not the create and delete ones can configure jobs but not rename them. With this plugin, they'll get a new **Ask for renaming** action on their jobs:

When clicking on it, they'll be presented with a screen that allows defining the new name for the job:

Jenkins

Jenkins » JobWtihTypo » Ask for renaming

 [Back to Dashboard](#)

 [Status](#)

 [Changes](#)

 [Workspace](#)

 [Build Now](#)

 [Configure](#)

 [Ask for renaming](#)

 [Ask for deletion](#)

Rename request

Current job name:

Rename to:

When clicking on the **Send request** button, a new item would appear in the administrator's management screen (cf. below) for him to perform (or not) the request.

Deletion request

Users who don't have the delete permission can't, of course, delete jobs. The plugin offers for them a new **Ask for deletion** action on their jobs:

Jenkins

Jenkins » JobWtihTypo

 [Back to Dashboard](#)

 [Status](#)

 [Changes](#)

 [Workspace](#)

 [Build Now](#)

 [Configure](#)

 [Ask for renaming](#)

 [Ask for deletion](#)

Project JobWtihTypo

[Workspace](#)

[Recent Changes](#)

When clicking on it, they'll be presented with a confirmation screen and, if the request for deletion is confirmed, a new item would appear in the administrator's management screen (cf. below) for him to perform (or not) the request.

For administrators

Administrators get a new **Pending renaming and deletion requests** entry in Jenkins' main configuration screen (**Manage Jenkins > Configure System**):

[About Jenkins](#)

See the version and license information

[Manage Users](#)

Create/delete/modify users that can log in to this Jenkins

[Pending renaming and deletion requests](#)

Allows processing renaming and deletion requests sent by users who don't have the right to do so by themselves.

[Prepare for Shutdown](#)

Stops executing new builds, so that the system can be eventually shut down safely.

This offers a screen which centralizes all renaming and deletion requests:

Pending renaming and deletion requests

The following errors occurred:

- Job Test2 already exists
- Job Test2 already exists

Discard selected requests

Apply changes from selected requests

Select?	Request	Requester	Creation Date	Jobs Main Page	Jobs Config File
<input checked="" type="checkbox"/>					
<input checked="" type="checkbox"/>	Rename job Test4 to Test2	user	02/24/2012 11:23	Test4	Config file
<input checked="" type="checkbox"/>	Rename job Test11 to Test2	user	02/24/2012 11:24	Test11	Config file

Administrators can then select a set of requests and apply or cancel them.

Version history

Version 1.1.0 (03/01/2011)

- Fixed [JENKINS-12897](#): RROD enhancements: Sort requests, link to config.xml, etc.
- "Pending renaming and deletion requests" screen enhancements
 - Displays the requests' creation date
 - A select All/None check box
 - An error messages box

Version 1.0.2 (10/17/2011)

- Fixed permission handling when using the [Role Strategy](#) plugin

Version 1.0.1 (10/07/2011)

- Permissions were not properly handled when using projects-based ones

Version 1.0 (09/08/2011)

- Initial release
