

JSch Plugin

Plugin Information

View JSch dependency [on the plugin site](#) for more information.

JSch Plugin

This plugin provides a shared dependency on the com.jcraft:jsch JAR - using this plugin will eliminate the classloader problems caused by having multiple copies of jsch loaded. **This plugin is not meant to be used by end users by itself.**

It's supposed to be included through the dependencies of other plugins, which want to use JSch library with support for SSH Credentials plugin.

Usage

TODO sample code for usage

Changelog

Version 0.1.55.1 (July 29, 2019)
