

incapptic connect uploader

incapptic
connect

The Incapptic Connect Uploader Plugin is a Jenkins plugin that allows app developers to automatically upload binary files of your apps (*.ipa, *.apk files) to the [incapptic Connect](#) platform. Incapptic Connect is an app release management and deployment automation platform that enables companies to simplify the process of releasing mobile apps. For more information please feel free to contact us at contact@incapptic.com!
