

Mock Agent Plugin

Plugin Information

View Mock Agent [on the plugin site](#) for more information.

Defines a dummy agent launcher and elastic cloud that really runs everything on localhost. Just for testing.

Changelog

Version 1.13 (Sep 11 2018)

- Better support for [Configuration as Code Plugin](#).

Version 1.12 (Mar 13 2018)

- Remove connection overhead unless pauses were explicitly requested, bringing performance in line with local JNLP agents or a simple local command launcher.

Version 1.11 (Oct 10 2017)

- Enable the plugin to work in a version of Jenkins using a snapshot version of Remoting.

Version 1.10 (Sep 09 2016)

- Allow the mock cloud to use non-one-shot agents with one executor apiece.

Version 1.9 (May 19 2016)

- Log launch time of agents.

Version 1.8 (Aug 04 2015)

- [JENKINS-25090](#) Fixes related to durable tasks.

Version 1.6 (Sep 24 2014)

- Integrating mock cloud with [Durable Task Plugin](#): such tasks can now resume on a mock cloud slave, even using the one-shot retention strategy.

Version 1.5 (Sep 17 2014)

- Mock cloud slaves will now use a "one-shot" retention strategy when the number of executors is set to 1.

Version 1.4 (Feb 19 2014)

- Added a mock cloud.
- Maybe added/restored Java 5/6 compatibility.

Version 1.2/1.3 (Nov 21 2013)

- Added a whole mock slave as a convenience.
