

Startup Trigger

Plugin Information

View Startup Trigger [on the plugin site](#) for more information.

The Startup Trigger plugin allows you to trigger a build when Jenkins nodes (master/slave) start. See GitHub for more usage info: <https://github.com/jenkinsci/startup-trigger-plugin>

Version History

Version 2.9.3 (April 13, 2018)

- Fix [JENKINS-50681](#) - Startup Trigger label list doesn't work with master
- Fix [JENKINS-45444](#) - Node parameter can no longer be a NodeParameter, it must be a LabelParameter
- Minor code cleanup/updates

Version 2.8 (2017-01-12)

- Fix [JENKINS-40823](#) - Pipeline job isn't triggered by startup-trigger
- Fix [JENKINS-40831](#) - Node parameter can be StringParameter

Version 2.7 (2016-10-10)

- Fix [JENKINS-38582](#) - Added "Run when temporarily online" support (Advanced option)

Version 2.6.3 (2016-09-16)

- Fix [JENKINS-22422](#) - Added node to build cause
- Fix [JENKINS-32659](#) - Added support for Cloudbees folders
- Enabled use of label expressions in the trigger label field
- Triggering node's name can be passed to jobs as a NodeLabel Parameter
- No longer running disabled jobs
- One single job can now be triggered by a list of labels

2.6-2.6.2 are omitted because they only contain updates to Maven configuration...

Version 2.5 (2015-12-02)

- Fix [JENKINS-31761](#) - No license specified

Version 2.4 (2013-04-28)

- Enable to specify a string for the trigger label as a substring of the node label.

Version 2.3 (2013-02-13)

- Fix [JENKINS-16841](#) - Add delay to startup trigger

Version 2.2 (2013-02-07)

- Fix label and log message

Version 2.1 (2013-01-26)

- Fix NullPointerException
- Refactoring

Version 2.0 (2013-01-19)

- Enable to trigger a build at node startup

Version 1.1 (2011-02-08)

- Update the cause and plugin description to Jenkins.

Version 0.1 (2009-12-30)

- Initial release
