

Pipeline Multibranch Defaults Plugin

Plugin Information
View Pipeline: Multibranch with defaults on the plugin site for more information.

Enhances Pipeline plugin to handle branches better by automatically grouping builds from different branches. Supports enable one default pipeline.

This plugin adds a new build configuration mode to multibranch pipeline jobs. The new mode is called "with default Jenkinsfile".

Refer to the [project README.md document](#) to learn more.

Changelog

Refer to the [CHANGELOG.md document](#) for plugin release notes.
