

Global Slack Notifier Plugin

Plugin Information

View Global Slack Notifier [on the plugin site](#) for more information.

This plugin adds the function to automatically notify completion to Slack to all jobs.

Setup

1. Setup [Slack Plugin](#)
2. Setup Global Slack Messages in Global Configuration
3. Any build notifies slack completion without any job configuration

Global Slack Messages

1. Set XXXMessage
2. Check notify on build XXX
3. Set channel notifying, if necessary.(Default channel is Slack Plugin's Channel)

- XXX is build result
