

# GitHub Organization Folder Plugin

## Plugin Information

View GitHub Organization Folder [on the plugin site](#) for more information.

**Obsolete** plugin. May be removed after you have upgraded to 1.6.

## Changelog

### Version 1.6 (Jan 16, 2017)

-  Please read [this Blog Post](#) before upgrading
-  Tombstone release that will migrate configuration and data from previous releases of the plugin.
- Once you have upgraded to this plugin, you can safely uninstall this plugin after a full re-index of all org folders and multi-branch projects.
- **There will be no more releases of this plugin**

### Version 1.6-beta-1 (Dec 16, 2016)

- Available from the experimental update center
- Tombstone release that will migrate configuration and data from previous releases of the plugin.
- Once you have upgraded to this plugin, you can safely uninstall this plugin after a full re-index of all org folders and multi-branch projects.
- There will be one more release of this plugin, i.e. a tombstone for the regular update center

### Version 1.5 (Sep 07, 2016)

- [JENKINS-31155](#) Added a dynamic external library loader matching `@Library('github.com/owner/repo')` syntax.

### Version 1.4 (Jul 28, 2016)

- [JENKINS-34692](#) Incorrect link for pull requests.
- Unconfirmed failure to clean up some state after an exception.

### Version 1.3 (Apr 18, 2016)

- [Upgraded](#) the main dependencies: `github-branch-source`, `cloudbees-folder` and `workflow-multibranch`.

### Version 1.2 (Mar 14, 2016)

- [JENKINS-33480](#) `NullPointerException` when configuring an organization folder.
- Now requires Jenkins core 1.642.1 or newer, since its Pipeline 1.15 dependency was already doing the same.

### Version 1.1 (Mar 10, 2016)

- Updated the dependency to refer to a released version

### Version 1.0 (Mar 8, 2016)

- First release
