

Concurrent Login Plugin

Plugin Information

View Concurrent Login [on the plugin site](#) for more information.

This plugin intercept a concurrent login to Jenkins.
You can apply if you use Jenkins's authentication.

If you use Jenkins authentication, it does not support concurrent login.

The screenshot shows the Jenkins configuration page for the Concurrent Login Plugin. The page is titled "Jenkins" and "configuration". The main content area is divided into several sections:

- System Message**: A message box with a "고침..." button.
- # of executors**: A text input field with the value "2".
- Quiet period**: A text input field with the value "5".
- SCM checkout retry count**: A text input field with the value "0".
- Global properties**: A section with checkboxes for "Restrict project naming", "Environment variables", and "Tool Locations".
- Maven Configuration**: A section with dropdown menus for "Default settings provider" and "Default global settings provider", both set to "Use default maven settings".
- Intercept Concurrent Login**: A section with a checkbox for "Activate/Deactivate" (unchecked) and a checkbox for "Check if you intercept concurrent login" (checked).

The "Intercept Concurrent Login" section is highlighted with a red box.

For security reasons, the plugin is useful when concurrent access should not be allowed
If you install the plugin and configure, you can only connection by one account.
session timeout settings: settings in the WAS or supports itself(1 min).
