

JGiven Plugin

Plugin Information

View JGiven [on the plugin site](#) for more information.

This plugin lets you generate [JGiven](#) reports as a post-build action.

Job DSL

The current supported dsl is as follows:

```
freeStyleJob('test-job') {
  publishers {
    jgivenReports {
      excludeEmptyScenarios() // Since 0.10
      html {
        customCss 'some.css'
        customJs 'some.js'
        title 'My Custom Title'
      }
      results '**/*.json'
    }
  }
}
```

Changelog

0.10.0 (25.12.2015)

-  Custom Files (js/css) are now taken from the workspace of the build and the path is interpreted relative to the workspace of the build ([JENKINS-30981](#))
- Updated JGiven to 0.10.1 and added support to configure to exclude empty scenarios ([JENKINS-31337](#))

0.9.1 (14.10.2015)

- Updated JGiven to 0.9.1
- First two digits of the version now indicate the version of JGiven used

0.9.0 (11.10.2015)

- Release failed - only SNAPSHOT was published

0.2 (25.9.2015)

- Added support for the [Job DSL Plugin](#).
- Upgraded JGiven to 0.8.2
- Only one Html Report (= previously called Html5 report) is supported

0.1.1 (21.02.2015)

- Renamed Plugin from jgiven-plugin to jgiven - existing installations need to install the new plugin and deinstall the old one.

0.1 (18.02.2015)

- Initial Release
