

Google Kubernetes Engine Plugin

The [Google Kubernetes Engine](#) (GKE) Plugin allows you to publish deployments built within Jenkins to your Kubernetes clusters running within GKE.

Plugin Information

View Google Kubernetes Engine [on the plugin site](#) for more information.

Older versions of this plugin may not be safe to use. Please review the following warnings before using an older version:

- [Missing permission checks allowed obtaining limited information about a credential scope](#)
- [Temporary secret stored in a user accessible location](#)

Consult the [google-kubernetes-engine-plugin](#) repository on GitHub for documentation.
