

# Translation Assistance Plugin

 The server handling submitted translations has been shut down. While this plugin is still useful for local translations, it's not possible to submit translations to the Jenkins project anymore.

## Plugin Information

View Translation Assistance [on the plugin site](#) for more information.

 Older versions of this plugin may not be safe to use. Please review the following warnings before using an older version:

- [Cross-site request forgery \(CSRF\) vulnerability](#)

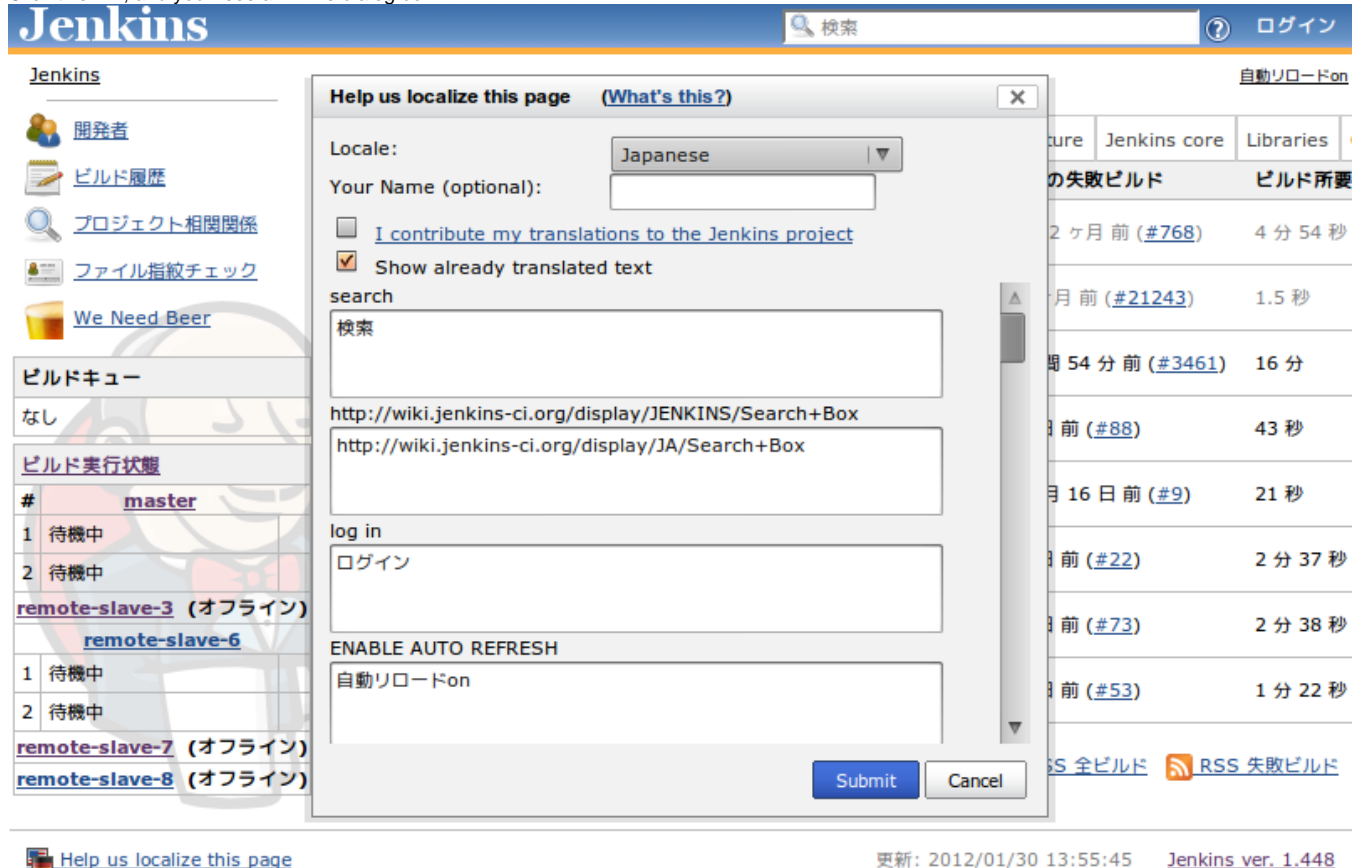

This plugin adds an additional dialog box in every page, which enables people to contribute localizations for the messages they are seeing in the current page. This reduces the barrier of entry to localization, and by showing messages in the context of a page, it should also improve the quality of the translation.

## How does it work?

Browse any page of Jenkins, and you'll see a link in the footer section that opens the translation dialog.

 [Help us localize this page](#)

Click this link, and you'll see an inline dialog box.

The screenshot shows the Jenkins web interface. At the top, there's a blue header with the Jenkins logo and a search bar. Below the header, there's a sidebar with navigation links like '開発者', 'ビルド履歴', 'プロジェクト相関関係', 'ファイル指紋チェック', and 'We Need Beer'. The main content area shows a 'ビルドキュー' (Build Queue) section with a table of build jobs. A dialog box titled 'Help us localize this page (What's this?)' is overlaid on the page. The dialog box has a 'Locale' dropdown set to 'Japanese', a 'Your Name (optional):' field, and two checkboxes: 'I contribute my translations to the Jenkins project' (unchecked) and 'Show already translated text' (checked). There's a 'search' field with the text '検索' and a list of search results showing URLs and their corresponding messages. At the bottom of the dialog box, there are 'Submit' and 'Cancel' buttons. The footer of the page contains a 'Help us localize this page' link, a timestamp '更新: 2012/01/30 13:55:45', and 'Jenkins ver. 1.448'.

Choose the locale that you'd like to contribute, then type the translation text. The message follows the format of [MessageFormat](#), and in particular,

1. Markers like "{0}" and "{1}" represent the arguments
2. Single quote (') needs to be escaped as two single-quote (')

Your name allows us to recognize your contributions and bypass manual review, especially when you've been contributing in the past. So do supply some unique string, even if it's not your real name.

If you have an administrative access to the Jenkins instance, your contributions will be reflected right away — just reload the page to see the effect. (If you do not have the access, your changes won't be reflected to the running instance for security reasons, but nonetheless they are sent to the Jenkins server.)

Your contributions are also sent to the Jenkins project for inclusion in future versions of Jenkins.

## Participating more to the localization effort

If you'd like to involve more deeply with the localization effort, please drop us a note at <http://groups.google.com/group/jenkinsci-dev>. Also see [Internationalization](#).

## Change Log

### Version 1.16 (Jan 22, 2018)

- [Fix security issue](#)

### Version 1.15 (Jun 21, 2016)

- [JENKINS-34713](#) Updated to the new parent POM. Some tests have been reviewed.

### Version 1.12 (Oct 30, 2014)

- German translation added.

### Version 1.11 (Jan 07, 2014)

- updated some translations or labels (French, Portuguese, Norwegian, Chinese Traditional, Telugu)
- do not allow Afrikaans to be the default language
- do not show footer to anonymous users without read permission
- fixed overlapping popup window
- attempted to fix an unreproducible NPE

### Version 1.10 (Nov 06, 2012)

- Added support for Tamil (ta) (pull #1)
- Updated Spanish translation of help text

### Version 1.9 (Mar 20, 2012)

- Added support for Faroese (fo)
- Added support for British English (en\_GB)
- Ensure icon is cached properly, as it is loaded on every page

### Version 1.8 (Oct 10, 2011)

- Fixed typo in plugin display name ([JENKINS-11235](#))

### Version 1.7 (Aug 29, 2011)

- Made to work with Jenkins

### Version 1.4 (Mar 22, 2010)

- Localization updates for this plugin

### Version 1.3 (Jan 19, 2010)
