

Vagrant-plugin

Plugin Information

View vagrant [on the plugin site](#) for more information.

This plugin allows booting of Vagrant virtual machines, provisioning them and also executing scripts inside of them

The plugin is a complete re-write of the previous plugin made by rtyler

Features

- Uses Vagrant 1.x version 2
- Supports booting a Vagrant VM for your job
- Execute scripts inside the VM as the "vagrant" user
- Execute scripts inside the VM as the "root" user (via sudo)
- Provision the Vagrant VM via the configured provisioner(s) from the Vagrantfile
