

Cucumber Slack Notifier Plugin

Plugin Information

View cucumber-slack-notifier [on the plugin site](#) for more information.

This plugin is up for adoption. Want to help improve this plugin? [Click here to learn more!](#)

A plugin to send a summarised cucumber report to a slack channel.

Jenkins Pipeline Usage

Use within a node block as the example below shows:

```
node {
  stage 'Cucumber Reports'

  // process cucumber reports
  step([$class: 'CucumberReportPublisher', jsonReportDirectory: 'target/', fileIncludePattern: '*.json'])

  // send report to slack
  cucumberSendSlack: channel: 'test-results-channel', json: 'target/test-results.json'
}
```

Installation Instructions

Global Configuration

Cucumber Report Slack Build Step Notifier	
Web Hook Endpoint	<input type="text"/>
	<small>This is the uri of the webhook endpoint on slack</small>
Jenkins Server url	<input type="text"/>
	<small>This is the uri of the jenkins server</small>

Job Configuration

Build	
Cucumber Report Slack Build Step Notifier	
Channel	<input type="text" value="cucumber"/>
	<small>Which slack channel to post to ...</small>
JSON Result File	<input type="text" value="target/test.json"/>
	<small>Location of the JSON result file for Cucumber</small>
<input type="button" value="Delete"/>	
<input type="button" value="Add build step"/>
