

# Enhanced Old Build Discarder

## Plugin Information

View Enhanced Old Build Discarder [on the plugin site](#) for more information.

Enhanced Old Build Discarder is a Jenkins plugin that extends the functionality of the internal build discard plugin with an option to prevent discard of builds when the job is unstable, in addition to the ability to require both age and quantity conditions be met prior to build discard.

The plugin is configured as a build rotation strategy labelled *Enhanced Log Rotator* in the internal *Discard old builds* feature. It can additionally be configured as a Pipeline script using a call to `properties()` such as:

```
properties([[ $class: 'BuildDiscarderProperty', strategy: [ $class: 'EnhancedOldBuildDiscarder',  
  artifactDaysToKeepStr: '', artifactNumToKeepStr: '', daysToKeepStr: '10', numToKeepStr: '10',  
  discardOnlyOnSuccess: false, holdMaxBuilds: true ] ]]);
```

## Version History

1.4 (2019-08-01)

- Added feature to enforce both age and quantity conditions be met prior to build discard
- Updated plugin dependencies
- Added plugin unit tests
- Added CI testing
- Added help documentation

1.0 (2013-06-07)

- Release version
