

Performance Plugin

Plugin Information

View Performance [on the plugin site](#) for more information.

This plugin allows you to capture reports from popular testing tools. Jenkins will generate graphic charts with the trend report of performance and robustness.

It includes the feature of setting the final build status as good, unstable or failed, based on the reported error percentage.

Report formats supported:

- [JMeter](#) XML and CSV format, also Summarizer log output
- [Taurus Tool Final Stats XML](#) (through it, you can publish summaries from JMeter, Gatling, Grinder, Siege, ab, Selenium and [many others](#))
- JUnit format (used by SoapUI for example)
- [Twitter's ligo](#)
- [wrk](#)

Documentation:
