

# PlatformLabeler Plugin

## Plugin Information

View Platform Labeler [on the plugin site](#) for more information.

This plugin adds node labels based on the OS and architecture of the node; they are updated each time the node connects.

See the [README](#) for more details. **Example labels:**

```
6.5 RedHatEnterpriseServer RedHatEnterpriseServer-6.5 amd64 amd64-RedHatEnterpriseServer amd64-RedHatEnterpriseServer-6.5
```

## Changelog

### Upcoming changes

- TBD

### Version 3.2 (June 16, 2019)
