

Change publish over SSH configuration

This script changes the configuration for the plugin: [Publish Over SSH Plugin](#)

It will change the configuration name from "bad-server" to "good-server" for FreeStyleProjects.

```
import java.util.*
import hudson.model.*
import hudson.maven.*
import hudson.maven.reporters.*
import hudson.matrix.*
import hudson.tasks.*
import hudson.util.DescribableList
import jenkins.plugins.publish_over_ssh.*
import jenkins.plugins.publish_over.*

HUDSON = Hudson.getInstance()

HUDSON.items.findAll{job -> job.isBuildable() }.each{
    job ->

    if(job instanceof FreeStyleProject) {
        for (builder in job.builders){
            if(builder instanceof BapSshBuilderPlugin) {
                ArrayList<BapPublisher> publishers = builder.delegate.delegate.publishers

                for(publisher in publishers) {
                    if (publisher.configName == "bad-server") {
                        println "Changing job: ${job.name}"
                        publisher.configName = "good-server"
                    }
                }
            }
        }
    }
}
```
