

Fabric Beta Publisher Plugin

Plugin Information

View Fabric Beta Publisher [on the plugin site](#) for more information.

The current version of this plugin may not be safe to use. Please review the following warnings before use:

- [Credentials stored in plain text](#)

Allows users to publish Android apps to [Fabric Beta](#)

Features

- Upload .apk file to Fabric Beta
- Choose to notify testers
 - By a group alias
 - By a list of e-mails
- Specify release notes
 - From the Jenkins changelog
 - With a build parameter
 - From a text file
- Pipeline support
- Add `FABRIC_BETA_BUILD_URL` and `FABRIC_BETA_BUILD_URL_{n}` environment variables after successful upload. The `{n}` is replaced with the APK index.

Changelog

Version 2.1

- Fix unzip APK issue after migrating to AndroidX and ProGuard ([#44](#))

Version 2.0

- Make possible reading the changelog from a file on a slave (**Note:** the path is now relative to the workspace and not absolute – you have to change it in your configuration)

Post-build Actions

Upload .apk to Fabric Beta

Fabric API key

5a3b0203215ad9361151b78162b22359b3acc655

Fabric build secret

3afb2f8becbdfd58f9f733017ef3eee1b9fc80c443272e787eac63f031f7c0c8f

.apk file path(s)

app/build/outputs/apk/app-debug.apk, app/build/outputs/apk/different-app.apk

path as ant-style include
