

Coding Webhook Plugin

Plugin Information

View Coding Webhook [on the plugin site](#) for more information.

This plugin integrates [Coding](#) with Jenkins. It handles [Webhook](#) request and triggers builds for push and merge/pull request events.

Features

This plugin is a build trigger for Coding Webhook, it can:

- Trigger builds for push events
- Trigger builds for merge/pull request events
- Report build result via comment
- Webhook events filtering

Usage

See: <https://open.coding.net/ci/jenkins>

ChangeLog
