

ThreadFix Plugin

Uploads any supported ThreadFix scan file to your ThreadFix server

Plugin Information

View ThreadFix on [the plugin site](#) for more information.

Note:

- This plugin is *NOT* maintained by **Denim Group**
- Plugin version 1.0 supports ThreadFix versions 1.0 and 2.0.

Features

- Upload any supported scan file(s) from your Jenkins Slave/Master to your ThreadFix web server using your ThreadFix API Keys.
- Ability to specify any scan filename under the Project's workspace using Jenkins's environmental variables.
- ThreadFix [REST API](#) is used for all communication from the Jenkins Server.
