

Hudson Monitor Gadget for Microsoft Sidebar.

This Hudson Monitor gadget for Vista / Windows 7 sidebar provides an easy way to keep an eye on the status of your Hudson jobs.

Work with Hudson v1.92 and later

The screenshot shows a Microsoft Sidebar gadget titled "ActiveMQ". It features a yellow sun icon, a "Link" button, and a "Close [X]" button. The main content area displays the "ActiveMQ" logo in large, stylized letters. Below the logo is the URL <http://activemq.apache.org>. A table shows the following data:

W	Description	%
	Test Result: 4 tests failing out of a total of 3,632 tests.	99
	Build stability: No recent builds failed.	100

On the right side, a "Hudson" sidebar is visible, showing a list of jobs: "ActiveMQ" (yellow sun icon) and "Ant-Build-Matrix" (red circle icon). At the bottom of the sidebar, there are navigation arrows and a "1/1" indicator.

Installation

Download the gadget package file from <http://code.google.com/p/hudsonmonitor/>

On a windows system, simply double-click the downloaded file to have it register itself with Microsoft Gadgets. Use Gadget settings to get jobs from Hudson servers.
