

Skip Certificate Check plugin

This is a plugin that makes JVM bypass all the HTTPS certificate checks. Convenient if you deal with self-signed certificates and so on. Use with caution.

Plugin Information

View skip-certificate-check [on the plugin site](#) for more information.

Usage

This plugin doesn't require any configuration. It activates itself when Jenkins starts.

Changelog

Version 1.1 (upcoming)

- Fixed a ticket just for the sake of demo ([JENKINS-10932](#))

Version 1.0 (Sep 7th 2011)

- initial version
