

Violation Columns Plugin

Plugin Information

View Violation Columns(List View Columns) [on the plugin site](#) for more information.

This plugin allows you to add columns to your Views with data from the [Violations Plugin](#).

With the help of this plugin you can create columns containing data for the following types taken from the Violations Plugin:

- checkstyle
- codenarc
- cpd
- cpplint
- csslint
- findbugs
- fxcop
- gendarme
- jcreport
- jslint
- pep8
- perlritic
- pmd
- pylint
- simian
- stylecop

This plugin can also add a column that counts the number of failed tests for every job in the View.

Usage

Create a brand new View or edit an old one and just add the columns you need from the list.

If data cannot be obtained for a certain job, then N/A will stand in the corresponding row and column.

Important - in order to use this plugin you must have the Violations Plugin installed.

Change log

Version 1.6 - (02.10.2013)

- Fixed a reported issue with the pylint column: [JENKINS-19742](#)

Version 1.5 - (25.04.2013)

- Package rename - this will lead to NoClassFound exceptions, columns should be added one more time to the views. Sorry for the inconvenience.
- All columns that show data from ViolationsPlugin are now listed under "Violation *name*" in order to be found easier.

Version 1.3 - (12.03.2013)

- Required core version changes 1.500- >1.409

Version 1.0 - (06.03.2013)

- First release.

About

The plugin is open source.
