Use Case

After the plugin is installed, in job configuration's page, you can see Hidden Parameter:

for example, you add a hidden parameter, is called hidden_para.

click 'Build With Parameters' link, the parameter hidden_para of the set before, is hide, don't display in this page.

Jenkins > helloWorld_test >

Project helloWorld_test

需要如下参数用于构建项目:

string_para
普通string参数

string_para2
普通string参数2

Build with Parameters (circled in red)

Build History 构建历史

#1 2015-1-9 下午5:14

RSS 全部 RSS 失败

After the build , click 'Parameters' link, parameter list can display hidden parameters hidden_para.

Jenkins > helloWorld_test > #1 > Parameters

执行 #1

构建参数

hidden_para (circled in red)
hidden参数值

string_para
普通string参数

string_para2
普通string参数2

Parameters (circled in red)
