

LTS Release Line

Most of this content has moved to <https://jenkins.io/download/lts/>

See [Backporting toolkit for LTS](#) for the tooling available for the developers.

Call for help/action

- We need impacted users to flag JIRA issues as "lts-candidates" so we know what to focus on.
- During the RC period we encourage users to test it and report back their findings. Any tests are fine. If you do not have any, check community maintained [test plan](#).
