- CSRF vulnerability

Allows users to create or update a Kanboard task as a post-build action, trigger a build when a task is created or moved, and fetch a task and its attachments as a build step.Kanboard is an open source tool to manage projects using a Lean Kanban approach.

Requires Kanboard version >= 1.0.36.

Change Log

Versions 1.5.9-1.5.11 (Sep 25, 2018)

- Security fixes.

Version 1.5.8 (Mar 13, 2017)

- The plugin now allows task tags management. You can add new tags (or remove existing ones) using a comma separated string of tags. Prefix a tag with "-" to remove it.

Version 1.5.7 (Dec 20, 2016)

- A Kanboard task attachment maximum allowed size can be defined in the global configuration, attachments of a bigger size won't be sent to the Kanboard server.

Version 1.5.6 (Dec 18, 2016)

- Renamed from kanboard-publisher-plugin to kanboard-plugin.

Version 1.5.4 (Dec 17, 2016)

- Trigger now also fires on task move (column change), it was only available on task creation before.

Version 1.5.1 (Dec 16, 2016)

- A new build step is now available that allows to fetch a Kanboard task and some of its attachments available through the KANBOARD_TASKJSON and a few others environment variables.

Version 1.4 (Dec 16, 2016)

- Can trigger a build when a Kanboard task is created, the corresponding task reference is exported to the KANBOARD_TASKREF build environment variable.

Version 1.3.3 (Dec 15, 2016)

- Allow to define task color via the KANBOARD_TASKCOLOR environment variable.

Version 1.3.1 (Dec 14, 2016)

- Internationalization and french translation added.

Version 1.2 (Dec 09, 2016)

- Debug mode now globally configurable and disabled by default.

Version 1.1 (Dec 08, 2016)

- Export Kanboard task URL as KANBOARD_TASKURL environment variable.

Version 1.0 (Dec 06, 2016)

- Initial version (requires Kanboard version >= 1.0.31).

Build when the Kanboard query returns recently created or moved tasks

Schedule (crontab format) (required)	H/2 * * * *
	Would last have run at lundi 19 décembre 2016 23 h 24 CET; would next run at lundi 19 décembre 2016 23 h 26 CET.
Kanboard project identifier (required)	$KANBOARD_PROJECT_DEFAULT
Kanboard query (required)	moved:today column:"waiting" assignee:jenkins

Official Kanboard advanced search syntax documentation

(from Kanboard Plugin)

Kanboard task reference regexp filter (optional)	([A-Z]+)-([0-9]+)

The trigger will only activate for tasks whose reference matches the regular expression. No filtering will be done if left blank.

This eventual regexp matching groups will be exported to the KANBOARD_TASKREF_[index of group] environment variables.

For example:

This regular expression ([A-Z]+)-([0-9]+) will match the reference ABC-12345 and will export the following environment variables:

- KANBOARD_TASKREF=ABC-12345
- KANBOARD_TASKREF_0=ABC
- KANBOARD_TASKREF_1=12345

(from Kanboard Plugin)
